# CROCOdoff

New generation of cutting crown

## CROCOdoff - new generation of cutting crown

Yarn clamping and cutting device with improved functionality and design to meet the requirements of modern spinning mills.

- Automatic and precise setting of opening and closing of CROCOdoff
  - closing of the device is set-up at 2 500 RPM of the spindle while opening is set up at 8 000 RPM
  - controlled Stop and safe Start-up for reduced breakage level
- Improved „CROCO teeth“ solution for clamping yarn and safe yarn cutting
- No uncontrolled yarn-end flying
  - reduction of the yarn breakage
  - energy consumption saving
- Elimination of time consuming cleaning
- Easy fixing on the spindle

The crown works automatically. Closing and opening is ensured by spindle speed change. Catching area has a meander (CROCO teeth) for catching and cutting the yarn.
